FOREWORD

This directory is published as an aid to small business and small disadvantaged business concerns seeking subcontracting opportunities with Department of Defense (DoD) prime contractors. It also has as its purpose to expand this country's industrial base by involving a greater share of this nation's small business community in providing the products and services required by the Military Departments and the Defense Logistics Agency for national security purposes.

The DoD requires large business prime contractors and subcontractors receiving contracts valued over \$1 million for construction, \$500,000 for all other contracts, as a specific term and condition of such contracts, to establish plans and goals for subcontracting with small business and small disadvantaged business firms. This requirement results in a significant subcontract opportunity market. For example, in FY 1983, DoD prime contractors made \$39.8 billion in subcontract awards, \$15.6 billion or 39.2% of which they awarded to small business firms.

The DoD is concerned about the erosion of the Defense industrial base, particularly at the subcontractor level, which is made up primarily of small business concerns. This base can be improved, both qualitatively and quantitatively, by a larger number of small business and small disadvantaged business exploring the subcontract opportunities existing with DoD prime contractors.

To assist the small business and small disadvantaged business firm, this directory is arranged alphabetically, by state, and includes the name and address of the DoD prime contractor, the name and telephone number of the Small Business Liaison Officer, and the product or service being provided to the DoD.

Contact should be made with the Small Business Liaison Officer who has knowledge as to what the firm has purchased in the past, is presently purchasing and what it may be planning to purchase in the future. This person can inform you as to how your firm may join the prime's subcontractor vendor team.

Small business and small disadvantaged business concerns should not overlook the procurement opportunities existing on a prime contract award basis at every DoD acquisition activity. During FY 1983, the DoD awarded \$22.8 billion in prime contracts to this nation's small business and small disadvantaged business firms. Information regarding such opportunities can be readily obtained by contacting the Small and Disadvantaged Business Utilization Specialist at the closest military installation. The specialist can provide information on procurement opportunities existing at that activity, and, very often can provide information regarding products and services being purchased at other military installations and activities. The specialist can also inform you as to the procedures to be followed to have your firm placed on the military installation's bidder's mailing list.
